THIS WEEK'S HEADLINES

CURRENT UPDATES & WHAT WE KNOW

These are interesting days that we are currently in. With all of the uncertainty, our goal at Sango is to continue to communicate with you on a regular basis. We are following the guidance of the Centers for Disease Control, the State, and CMCSS.

THIS WEEK

Schools are closed this week due to the rapid spread of the Covid-19 virus. Closing schools allows for both social distancing and the cleaning of the school building. Our custodians will clean all surfaces using a 2-step cleaning process to ensure that all bacteria is killed. With schools being closed for two weeks (next week being Spring Break), we understand that parents may need access to the medications their children take at school. For this reason, the school will be open on Monday from 7:00-11:00 a.m.. The nurse will be available to sign those medications out to parents.

SCHEDULED EVENTS

The Scholastic Book Fair will be returned to the vendor. We regret that not all students had the opportunity to shop, but the merchandise needs to be returned so it is secure and can be counted. Report cards are on hold until students return. We will communicate times for rescheduled events (Sango Showcase, Spelling Bee) upon return to school.

STUDENT WORK & ASSIGNMENTS

At this time, we are not sending work home for students to complete. Children thrive within structured environments and it will be important to provide opportunities during the day for students to be creative, read and discuss what they are reading, and participate in physical activity. It may be a good idea to create a daily structure in the mornings and afternoons for students to do these things. The activities could be modified for the age and ability of the child.
